Experience

Local Government Unit of Lupao (Internship)   **February 2025 - April 2025**
Computer Programmer

- My job here is to scan the pictures of leave card officers, then put them in Excel to calculate the values of leave absences. Also, it is to invent a new system of library search using a Java program. Also, I invented a system called the leave card officers in an Excel application to calculate the values of absences of every leave card officer.

College Major Projects

Wasebin: A Microcontroller-Based Waste Segregation Machine
Cenro, Municipal Hall of San Jose City
September 2024 - December 2025
STI College San Jose, Nueva Ecija

- This thesis represents the separation of wet and dry plastics using Arduino Uno, the dry and soil moisture the wet. Then the swing arm will go to dry and wet plastic in the smart trash can. This smart trash is a container that, when it is full, the trash will close using a scan technology.
